**HISTORY SUMMARY**

- No previous zoning entitlements exist, the land is an active farm for agriculture.

**ANALYSIS**

The applicant is requesting a rezone from General Rural (GR) Zoning to Medium Density Residential (RS-5). This zone change request will allow the applicant to develop a proposed residential subdivision which the applicant is concurrently pursuing a preliminary plat for approval of an 80 lot residential subdivision, currently under review with the City (refer to figure 1).

The scope of this review is for land use conformity/compatibility to the General Plan and does not include an in-depth analysis of the proposed subdivision design. Refer to Attachment A for project narrative. The property and the surrounding area is designated as a Master Planned Community (MPC). Per the General Plan, a MPC designation provides for large-scale (160 acres or more) master planned developments that includes a variety of residential products, including larger lots and smaller, attached housing, along with

supporting commercial and employment land uses to meet the daily needs of the residents. Residential areas are to include adequate open space, schools, churches, and neighborhood facilities. MPC developments are expected to provide off-site infrastructure enhancements as necessary to offset development impacts including needed roadway, bridge, and overpass capacity, as applicable.

This particular request is for 20 acres with the intentions of developing the remaining section of land (340 acres of land approximate) as a potential master planned type community (see figure 2). However, due to cost constraints beyond the applicant’s control, a small subdivision development is being sought for as the initial phase to the area. The applicant is accepting the obligation to develop the remaining section of land as a MPC type community to adhere to the City’s General Plan Land Use map, which is reflected as a condition of approval to work with the City of Maricopa via a separate recorded agreement before approval of the preliminary-plat.
