Amendment (GPA)**

**LAND USE ANALYSIS**

4550 N 12th Street

Phoenix, AZ 85014

CVL Job No: 1-01-03839-01

# Land Use Analysis

## 1. Proposed Major General Plan Amendment

Maricopa's General Plan, "Planning Maricopa," is an expression of the preferences of residents and property owners, and provides guidance to citizens regarding the physical development of the community. Its purpose is to provide a frame work for all of the interrelated functions of the City of Maricopa. It is a citizen-driven plan, which conforms both to the letter and spirit of "Growing Smarter Plus" legislation established by the State of Arizona to guide municipal planning and growth management.

The Property is currently split between the Maricopa General Plan's land use categories of Medium Density Residential (MDR), Master Planned Community (MPC), Low Density Residential (LDR) and Open Space (OS). A Major General Plan Amendment is requested to amend the existing land use designation to Master Planned Community (MPC) to facilitate the proposed development (Refer to Exhibit B, Existing General Plan Map and Exhibit C, Proposed General Plan Map).

The Project supports the City's goals, objectives, and vision by providing a variety of land use options that are compatible with the proposed Maricopa General Plan land use designation of MPC. The City's definition is provided below.

### **Master Planned Community**

*The Master Planned Community designation provides for large-scale (160 acres or more) master planned developments that include a true variety of residential products, including larger lots and smaller, attached housing, along with supporting commercial and employment land uses to meet the daily needs of the residents. Residential areas are to include adequate open space, schools, churches and neighborhood facilities. Overlay zoning in combination with comprehensive site planning provide for supporting infrastructure. MPC developments are expected to provide off-site infrastructure enhancements as necessary to offset development impacts including needed roadway, bridge and overpass capacity. The overall density is flexible to allow appropriate urban design for properties designated for Village Center. Overall densities for all residential dwellings in MPCs without a Village Center designation can range from 3.0 to 10.0 dwelling units per acre.*

The total maximum number of dwelling units permitted for the Project provides an overall residential density of 10 dwelling units per acre (du/ac) which is consistent with the density permitted by the proposed MPC general plan designation. This proposed amendment complies with numerous provisions of the City of Maricopa General Plan, including those items highlighted below.

## **Growth Area Element**

### **Goal A2: Achieve a balance in the community between jobs and housing.**

#### **Objective A2.1: Support land use requests that improve the balance between housing and employment within the Maricopa Planning Area.**

*Response: This request improves the balance between housing and employment within the City limits by providing the opportunity for employment areas and permitting multiple types of diverse and attainable housing to those looking to live, work and play in the City of Maricopa.*

#### **Objective A2.2: Assure that sufficient infrastructure is in place or necessary improvements are adequately planned and funded (i.e. remove from Vekol Wash, floodplain, adequate sanitary sewer and water supply).**

*Response: The applicant will secure all the necessary commitments from area utilities and intends to provide all required infrastructure at the time of project development.*

## **Land Use Element**

### **Goal B1.4.: Minimize conflicts between land uses.**

#### **Objective B1.4.1: Address land use compatibilities and incompatibilities when considering zone changes and development approvals.**

*Response: Murphy Park will continue to address land use compatibilities and incompatibilities in its ultimate design, character, and construction. As noted above, this project has established adequate buffers and transitions that include open space and landscaping along perimeter roadways and between land uses of differing intensities within the Project. Existing buffers are currently in place to the east and west, consisting of the approximately 130' wide canal adjacent to the Project's eastern property boundary and the approximately 300' drainage channel planned adjacent to the Project's western property boundary. Additionally, the Arden Trails community to the east, formerly known as Hartman Ranch, will be required to build a large perimeter wall east of the East Main Canal, which, in combination with the perimeter walls required for Murphy Park, will provide a 130' buffer with large walls on either side. The existing perimeter buffering in combination with the appropriate building setbacks and perimeter walls provided mitigate impacts to neighboring areas.*

**Objective B1.4.5: Update and consistently enforce the community’s development codes, including zoning, subdivision, and related regulations.**

*Response: The Project has and will adhere to and comply with the community development codes, including zoning, subdivision, and related regulations where applicable and required.*

**Goal B1.6: Coordinate land management and planning activities with neighboring Indian Communities, Federal, State and private interests.**

**Objective B1.6.1: Participate in regular meetings with Ak-Chin and Gila River Indian Communities to address land use and transportation issues and concerns.**

*Response: The applicant will coordinate with Ak-Chin and Gila River Indian Communities as needed to address any land use compatibility and/or transportation issues, where applicable, as the project progresses toward development.*

## **Housing Element**

**Goal B2.2: Assure the development of a diverse housing stock in both dwelling type and density.**

**Objective B.2.2.1: Identify and use available tools, including area specific plans, zoning and subdivision standards, to promote housing diversity in both type and lot size for existing and future PAD’s.**

*Response: Murphy Park provides the opportunity for employment areas and multiple types of diverse and attainable housing, along with time and market sensitive diversity with the full range of housing opportunities including higher-density residential uses under the integrated flexibility of the requested PAD zoning.*

## **Circulation & Connectivity Element**

**Goal E2.1: Develop an efficient and safe transportation system providing multi-modal connectivity to other cities and regions.**

**Objective E2.1.4: Plan for roadway corridors to improve local circulation and regional connections, such as north/south travel routes in addition to SR-347, and high capacity east/west regional travel routes. Implement policies, such as the Transportation Corridor Overlay Zoning District and incentives to encourage compatible land uses along these corridors at appropriate locations.**

*Response: The applicant has and will continue to address and implement all City adopted infrastructure standards and policies. Any proposed transportation facilities*

*within this project will be designed, and maintained with the adopted codes, design details, safety standards of the community, including landscaping and aesthetic standards.*

## **Parks, Recreation, and Open Space Element**

**Goal G1.c.1: Trails and open space design requires emphasis on walkability and connectivity across the property complete with connections to adjacent properties.**

**Objective G1.c.1.4: Future developments should incorporate open space, trails, and recreation as an integral design element, providing direct access and visibility to open space corridors from public ways**

*Response: Open Space, trails, recreation, and pedestrian linkage has been and will continue to be thoroughly addressed throughout the rezoning and development processes with the ongoing development of open space and landscaping details throughout the various planning and development stages of the project. The applicant has and will continue to adhere to all pedestrian circulation safety standards and requirements.*

**Goal H2.c.4: Create and maintain a system of recreational opportunities throughout the City.**

**Objective H2.c.4.2: Foster and maintain relationships with private and public entities to provide multi-use recreational facilities that promote fitness and activity.**

*Response: Design options for entrance features, park, recreation and amenity areas are identified in this narrative to be owned and maintained by an HOA. Proposed open space will contain open space corridors, common amenity areas and trail connections to promote recreational activity throughout the Project.*

Murphy Park achieves the aforementioned goals while providing the opportunity for development of an appropriate land use solution for this property in a growing area of Maricopa.

## 2. Companion PAD Land Use Categories

The key to the success of this development is to allow flexibility in the different land uses (residential, business park, and employment) throughout the 481-acre site. In response to market conditions and buyer demands, shifts in acreage and reallocation of land uses may be necessary. Large employers have varying needs insofar as the footprint of their facilities and whether it's 80 acres, 400 acres, or anything in between. As such, minimum and maximum acreages are set forth by this proposal to provide the necessary flexibility, while establishing a framework for the companion PAD. In order to accommodate changing real estate market and demographic conditions, specific locations and quantities of the proposed land use categories are subject to market conditions and will be dependent on the end user(s) of the Property.

The proposed concept reflects the existing conditions of the Property and neighboring land by proposing a gradual transition south to north from employment to residential, following the higher intensity development existing to the south to the residential uses proposed to the north.

An overall matrix is provided below identifying the acreages and general locations for each of the proposed land use categories. The matrix establishes a flexible entitlement process utilizing a land bank. The ranges do not intend to dictate the use for each acre of the site, instead they overlap and exceed 100% of the acreage available in pursuit of flexibility. This concept fits within the contemplated PAD and is best-suited for large projects like Murphy Park that rely on the ability to respond to market demands.

<b>Land Use Matrix</b>				
<b>Land Use Category</b>	<b>Min.</b>		<b>Max.</b>	
<b>Employment</b> (South end of property & east of Murphy)	80 acres	17%	401 acres	84%
<b>Business Park</b> (North of Employment or west of Murphy)	0 acres	0%	240 acres	50%
<b>Residential</b> (North of Employment)	80 acres	17%	401 acres	84%
<b>Total</b>	<b>481 acres</b>			

### Residential

Murphy Park intends to provide the opportunity for a mixture of housing products designed to meet the needs of the diverse population within the City, meeting the goal of providing a range of housing opportunities for all lifestyles and economic needs. The Residential category is intended to provide the opportunity for general residential uses, including but not limited to multi-family, single-family, and alternative housing products, to be provided in suitable

and appropriate quantities and locations for the development. Development standards and use regulations for the Residential category are designed to promote compatibility with the surrounding area and meet the market demand for housing in the City of Maricopa. A minimum of 80 acres and maximum of 401 acres are proposed for Residential to be generally located north of Employment.

Murphy Park will provide a diverse, affordable and high-quality housing solution to the lack of housing diversity that is especially found in the eastern portion of the City of Maricopa, where it is especially needed given that is the logical employment hub and its proximity to Casa Grande and the future transportation corridor of Sonoran Desert Parkway to I-10.

As Murphy Park begins to develop, approximately 17 years after the initial zoning approvals on the property, there is an opportunity to update the existing entitlements to better suit current market demand by introducing diverse and innovative housing stock to support the City’s initiatives as well as bring the design up to accommodate the City’s new zoning code requirements and design criteria established for PAD communities. Murphy Park will provide a diverse, affordable and high-quality housing solution to the lack of housing diversity that is especially found in the eastern portion of the City of Maricopa, which is the City’s major growth area both in terms of future employment uses and in terms of population growth.

In conformance with the City’s MPC land use designation, an overall density of up to 10 dwelling units per acre is permitted for the overall Residential portion of the PAD. Minimum and maximum percentages for the above-mentioned Residential sub-categories are established in the table below.

<b>Residential Matrix</b>				
<b>Residential Land Use Category</b>	<b>Min.</b>		<b>Max.</b>	
	80 acres	17%	401 acres	84%
<b>Residential Sub-Category</b>	<b>For &lt; 100 acres</b>		<b>For &gt; 100 acres</b>	
	<b>Min.</b>	<b>Max.</b>	<b>Min.</b>	<b>Max.</b>
<b>Multi-family</b>	0%	50%	5%	35%
<b>Alternative housing product</b> (cluster, alley-load, etc.)	0%	75%	5%	50%
<b>Single-family residential</b> (min. 40' wide)	0%	80%	25%	80%

## **Business Park**

The Business Park category is intended to provide the opportunity for general business and/or commercial uses. A minimum of 0 acres and maximum of 240 acres are proposed for Business Park to be generally located north of Employment or west of Murphy Road. Development standards and use regulations for the Business Park category are designed to promote compatibility with the surrounding area while providing for a broad range of applicable activities within this category.

## **Employment**

The Employment category is intended to provide the opportunity for those uses generating employment such as office, storage, and light industrial uses. A minimum of 80 acres and maximum of 401 acres are proposed for Employment to be generally located on the south portion of the Property and east of Murphy Road. Development standards and use regulations for the Employment category are designed to provide the buffering necessary to minimize potential incompatibility between higher intensity uses and land uses that may have less intensity. Higher intensity uses will be contained and screened from outside visibility, as required by the City, to mitigate impact with nearby development.

Uses considered within this proposal would be those light industrial, office, storage, datacenter, distribution, laboratory and manufacturing uses that do not create any danger to health and safety in surrounding areas; do not create offensive noise, vibration, smoke, dust, odor, heat or glare; and generate less truck traffic when compared to higher intensity industrial uses.

As demonstrated above, this Project offers a wide range of permitted uses, thus allowing for the flexibility that can satisfy market conditions and meet the needs of present and future residents and business owners in the City at the time of development. As such, the land use categories and matrix percentages established in the preceding tables apply to Murphy Park overall, not tied to individual parcels. This data will be tracked by an annual reporting requirement per a Development Agreement where the Developer shall submit to the City a land use bank for all uses, including the sub-uses of residential. When the Developer submits new site plans and/or preliminary plats, the Developer shall update the reporting for acres of employment, acres of residential, and mix of residential (including open space, parks, and other shared common elements as required).

The subsequent site plan and design review submittal(s) will further refine this proposal in addressing site design and relevant requirements such as site access, vehicular and pedestrian circulation, landscaping, architecture, public services, and other required site improvements. All site plan and design review submittal(s) for the Project are to remain in conformance with the requirements of the City Code, as modified by this proposal.

### **3. Landscape and Open Space**

The proposed Landscape and Open Space standards for the Murphy Park property shall comply with the City Code and design standards for each of the various land use categories proposed in the companion PAD. Regardless of the acreages of each category proposed, the landscape character, materials, and style of the Murphy Park project shall be complimentary between all land uses and shall not create a defined line of land use boundary. Open space areas will be primarily focused on creating a feeling of spaciousness, using uniform details and plant materials, providing a variety of screening techniques and setbacks for visual interest, and creating linear connections to unify the property.

### **4. Circulation**

The Property is bounded and traversed by two minor arterial roadway alignments. On the north boundary is Steen Road, an east-west minor arterial roadway. Murphy Road, a north-south minor arterial roadway, traverses through the center of the subject property beginning at its intersection with Steen Road to the north and to the south of Murphy Park it continues along its alignment under the ownership and control of a Native Sovereign Nation. Access to the Maricopa Casa-Grande Highway is available at the discretion of such Nation and applicable laws.

Primary access to the Project from the north and south will provide signage and landscaping to provide residents, visitors, and regular users with a sense of arrival into the development. Half-street infrastructure improvements will be provided along the perimeter roads bounding the Property to City standards. Infrastructure details, interior street patterns, and access and circulation for each development parcel will be detailed during the development process per adopted City standards.

Pedestrian circulation within the development will be provided by sidewalks, open space paved and/or unpaved pathways per City standards. Circulation along the local streets will occur on detached sidewalks with tree-lined streets and decorative street lights to further enhance the distinct environment of the development. Connections to the open space areas from these sidewalks will be provided by pathways that meander through the open space. All paved access routes shall meet ADA guidelines.

All required onsite and offsite improvements related to the Project shall be addressed with the extent of such improvements, as well as the phasing of such, to be defined subject to City Engineer review and approval of detailed development plans, engineering reports, traffic reports, and so forth to be provided during the plan review process.

## 5. Public Utilities and Services

All proposed utility systems and plans will be accessed and designed per the standards of the City and utility company to be submitted for review and approval during the development process. A list of current utility providers for the Property is provided below.

Service	Provider
Water	Global Water Resources
Wastewater	Global Water Resources
Electric	Electrical District #3 (ED3)
Communications	Orbitel OR CenturyLink OR Hotwire Communications
Gas	Southwest Gas Corporation

### Water and Wastewater

The Project has an Infrastructure Coordination Agreement in place with Global Water that obligates Global Water to provide water and wastewater service to the Project. A will serve letter request was sent to Global Water Resources and they responded that the Property is within their jurisdictional boundaries. A will serve letter has been obtained from Global Water – Palo Verde Utilities Company, Inc. and Global Water – Santa Cruz Water Company, Inc. confirming water and wastewater service for the Project.

### Dry Utilities

A will serve letter request was sent to Electrical District #3 (ED3), CenturyLink, and Southwest Gas Corporation. They responded that the Property is within their jurisdictional boundaries and have provided will serve letters confirming service for the Project. Will serve letters from Orbitel and Hotwire Communications have been requested as well.
