| City of Mesa | \$800,000 | \$13,000,000 |

f. BRIEF DESCRIPTION OF PROJECT AND RELEVANCE TO THIS CONTRACT (include scope, size, and length of project)

EPS Group was the Prime Consultant for the design of this federally (HSIP) funded urban arterial intersection widening project for the City of Mesa. The intersection project components included the following:

- Federal Funding
- Older Urban Arterial Intersection Widening
- NEPA Document
- Irrigation Relocations in BOR Easements
- 69kV and 12kV Power Relocations
- Extensive Utility Coordination
- Adjacent Business Coordination
- Public Involvement Program
- Access Modifications/ New Medians
- Signal and Lighting Design
- Storm Drain Design
- Extensive Pedestrian/Bike Accommodations
- Residential and Commercial R/W acquisitions
- Landscape Design

In addition, design project included consideration of an adjacent well site, a power substation, a former LUST site, and older residential areas. The proposed intersection widening to 9 lanes in all directions would have resulted in the acquisition of numerous homes and businesses. EPS's unique intersection design approach narrowed the medians and utilized reverse curves to avoid several homes and businesses saving \$2 Million R/W costs.

f. BRIEF DESCRIPTION OF PROJECT AND RELEVANCE TO THIS CONTRACT (include scope, size, and length of project)

Spring Training Facility:

EPS Group provided Civil Engineering, Traffic Engineering, and Surveying Services for the design of the Spring Training Stadium for the Chicago Cubs. Currently in construction for the planned 2014 Spring Training season, the 120 acre facility design included site demolitions, mass grading, site utilities, parking and roadway design, high capacity roundabout design and analysis, curbs, paving, signing and striping, horizontal control, building utility connection plans, and site drainage. The demolition plans included transformation of all of the old Riverview Golf Course into a clean site for the facility's proposed land uses. Extensive demolition details and specifications were supplied including needed revisions to preserve utility connections and the dismantling of the old lakes and irrigation facilities.

EPS Group was a team member in the success of the Construction Manager At-Risk (CMAR) delivery format. In partnership with the architect and contractor, EPS Group effectively developed plans for multiple GMP's for City approval, formulated baseline costs, and provided recommendations for cost-saving measures. EPS Group maintained the fast-track project schedule in this CMAR environment (completing the demolitions, mass grading, and infrastructure utilities pre-package in 8 weeks!) greatly benefiting the bidding and budgeting processes for the City and the Cubs organization.

Riverview Park:

EPS Group (as a subconsultant) completed the redesign of the 42 acre Riverview Park. Park designs included pedestrian facilities, ramadas, new athletic fields, maintenance of the existing softball complex, numerous water features, lakeside pavilion, restrooms, rock climbing walls, and playgrounds. The project also involved the overall planning of the future retail and commercial centers surrounding the park. EPS Group developed demolition plans which included the removal of all park and lake facility components. EPS played a key role in the design of the new lake including service to many mechanical components (i.e. lake pumphouse, restroom facility, splashpad, fountain feature, and entry monument pool).

f. BRIEF DESCRIPTION OF PROJECT AND RELEVANCE TO THIS CONTRACT (include scope, size, and length of project)

West Kingman TI serves is a primary link between the Phoenix and Las Vegas. Traffic at this interchange is extremely heavy on weekends and holidays and has become exacerbated with the opening of the Hoover Dam Bypass. EPS Group developed interim and ultimate recommendations to resolve this condition by developing design concepts for a fully-directional interchange between I-40 and US 93. The DCR and NEPA environmental document included consideration of access control, impacts to local businesses, numerous washes, historic and prehistoric features, and difficult terrain. In addition, significant public involvement efforts are required to address local concerns and develop project consensus.

f. BRIEF DESCRIPTION OF PROJECT AND RELEVANCE TO THIS CONTRACT (include scope, size, and length of project)

EPS Group and was the Prime Consultant for the design of this 2 Year project for the City of Peoria. This arterial roadway widening project had many of the same design elements common to intersection widening projects including:

- Urban Arterial Roadway/Intersection Widening
- Irrigation Modifications
- 12kV Power Relocations
- Extensive Utility Coordination
- Adjacent Business Coordination
- Public Involvement Program
- Access Modifications/ New Medians
- Signals and Lighting
- Storm Drain Design
- Pedestrian/Bike Safety Elements
- Water and Sewer Utility Design
- Landscaping Design
- Surveying
- Legal Descriptions

| c. PROJECT OWNER Town of Gilbert | d. DOLLAR AMOUNT OF PROJECT \$620,000 | e. TOTAL COST OF PROJECT \$10,000,000 |
|-------------------------------------|--|--|

f. BRIEF DESCRIPTION OF PROJECT AND RELEVANCE TO THIS CONTRACT (include scope, size, and length of project)

EPS is provided the Project Management and Construction Management (PM/CM) services to the Town of Gilbert for the Scalloped Streets East project. Primary improvements included the widening of Baseline Road (Eastern Canal to ½ mile west of Recker Road), Recker Road (Houston Ave to Baseline Road), Higley Road (600 north of Pecos Road to Frye Road), and Guadalupe Road (Higley Road to ½ mile east). The proposed improvements also included a 16" Zone 2 waterline and a 16" Zone 4 waterline along Baseline Road from Recker Road approximately 2,000 feet to the west. Baseline Road and Higley Road are major arterials with a raised median. Significant coordination occurred with several ongoing and proposed development projects along these roadways. Substantial coordination also was required for the relocation of RWCD and SRP power facilities. Last but not least, significant coordination and teamwork occurred pertaining to the right-of-way appraisal and acquisition processes. An excellent working relationship between the design engineer, PM/CM, Town staff, appraiser, and acquisition agent occurred throughout this project.

6. ADDITIONAL INFORMATION

a. PROVIDE ANY ADDITIONAL INFORMATION YOU FEEL MAY BE NECESSARY TO DESCRIBE YOUR FIRMS QUALIFICATIONS. (ATTACH ADDITIONAL SHEETS AS NEEDED.)

EPS Group Inc., a locally-owned Arizona firm, was founded to provide professional consulting services to public and private clients throughout the State of Arizona. EPS has an extremely talented and highly qualified staff that includes Arizona registrants in Civil Engineering, Surveying, Traffic Engineering, and Landscape Architecture. Each of its discipline leaders and several key employees are owners who encourage and support EPS's entrepreneurial spirit of quality, service, communication and customer satisfaction. This core group of owners has worked together on projects Statewide and in the Valley for over 30 years, bringing more than 200 years of combined experience to EPS's clients.

We all know the Arizona economy has been significantly impacted since 2006 with many engineering firms shrinking in size and capacity. EPS, however, has increased its registrants in engineering, land surveying, and landscape architecture by 60% and our staff by 140%! The EPS team includes registered engineers, designers, CAD technicians, registered surveyors, survey technicians, construction managers, construction inspectors, and registered landscape architects. We have never been better positioned to provide the professional services to our clients and to deliver the services within the desired scopes, schedules and budgets.

Outstanding Quality Control and Service! Every EPS staff and team member knows the critical importance of preparing clear, error free plans. Each project delivered by EPS conforms to the requirements of our Quality Assurance Program. It outlines the responsibilities and procedures for delivering a quality product, including checking, back-checking, and reviewing procedures. Prior to submittals, project documents are reviewed for constructability and checked for accuracy and completeness relative to the stage of plan development. During our internal quality reviews of reports, designs, and drafting, individual reviews are performed by our QA/QC Manager and the Project Manager. They continuously communicate with the Design Team to ensure that design documents are clear and represent sound engineering. The most important verification of our Quality Control and Service are the comments received from our clients.

Client comments:

SERVICE & RESPONSIVENESS: Cottonwood Lane Improvements - "EPS has performed at a level that has exceeded both mine and my staff's expectations. They are responsive to our needs and bring fresh ideas to the table."
Kevin Louis, City of Casa Grande, Public Works Director

QUALITY: State Route 95 Corridor Study - "The EPS Group overall performance was very well done. The review time was relatively low because of the EPS effort (quality)." Mike Kondelis, ADOT Kingman District Engineer

PUBLIC OUTREACH: Valencia Road Improvements - "I just wanted to say that I thought all of you did an outstanding job once again last night! . . . the information was perfect." Rick Ellis , Pima County DOT, Engineering Division Manager

7. ANNUAL AVERAGE PROFESSIONAL SERVICES REVENUES OF FIRM FOR LAST 3 YEARS

| | | |
|----|--|------|
| a. | Percentage of Total Work Attributable to State, Federal and Municipal Government Work: | 63.5 |
| b. | Percentage of Total Work Attributable to Non-Government Work: | 36.5 |

8. AUTHORIZED REPRESENTATIVE. The foregoing is a statement of facts.
