On June 5, 2012, Council approved a contract award to CORE Construction for Fire Station 572. The project had a limited budget and was phased over several fiscal years to allow the project to be built within the CIP funding and revenue available.

On March 4, 2014, Council approved a contract award with FCI Constructors, Inc. for phase 2 of the project, which included site fencing, additional landscape, and other site amenities to meet zoning requirements. The Phase 2 contract was structured such that additional work could be authorized under future appropriations. The Fire Department budgeted additional money in this year’s CIP to finish the desired projects, including interior improvements, concrete paving for the site, and the installation of a fuel cell.

This item will be presented by William P. Fay, Public Works Director.
